POLO  
SHIRTS

*There is much debate about where the polo shirt originated, but what we do know is that the popular present-day wardrobe staple has a fascinating sporting history. It's widely believed that the polo shirt was developed by the iconic 1920's star Rene Lacoste, however, historians have also dated it back to polo matches in the mid-1800s in Manipur India.*

*Interesting Fact:  
The white, short-sleeved, loosely-knit piqué cotton designed by Lacoste was known as 'jersey petit piqué'*

SWEATSHIRTS  
& HOODIES

# 35. Practical CHILDREN’S

*The 18th century saw the dramatic change in children’s clothing, up until this time children were dressed in small versions of adults clothing, often mimicking the attire of their parents. Children up to age 6 wore long loose dress like garments, in fact, up until about the 1930’s or 1940’s, all baby’s and toddlers were dressed alike without differentiating between genders.*

*Interesting Fact:  
The tradition of gendered clothing has only been around since the 1920’s.*

51. Professional

SHIRTS

*In 1827 a US housewife, Hannah Montague invented the detachable collar. Tired of constantly washing her husband’s entire shirt when only the collar needed it, she cut off his collars and devised a way of attaching them to the neckband after washing. It wasn’t until the 1930s that collar stays became popular, although these early accessories resembled tie clips more than the small collar stiffeners available today.*

*Interesting Fact:  
The humble shirt was originally worn as an undergarment.*

*One of the first designers to specialise in sports-specific clothing was John Redfern from the Isle of Wight who in the 1870s began designing tailored garments for increasingly active women who rode, played tennis, went yachting, and did archery.*

*Interesting Fact:  
Henry Austin was the first person to wear shorts at Wimbledon in 1932*

HI-VIS

*The hi-vis, invented by Bob Switzer from the US has been familiar workwear for people in Britain since the '60s. The fabric paint was created in the 1930s by Switzer who was injured in a workplace accident and used his recovery period to invent a neon paint by mixing fluorescent minerals with wood varnish.*

*Interesting Fact:  
The first high vis clothing garments in the UK were trialled by Glaswegian railway maintenance workers in 1964.*

TROUSERS

*From the mid 19th century until the 1970s, manual labourers, refuse collectors and coal men wore distinctive practical clothing and accessories including flat caps, corduroy trousers, heavy boots and the classic donkey jacket. Donkey jackets soon evolved to feature leather shoulder patches to prevent wear and damage when shouldering a spade or pick.*

*Interesting Fact:  
Workwear has had a significant impact on the fashion industry, with many high end clothing brands adopting its utilitarian style.*

### WASHING

Before washing, always look at the care label and carefully follow the instructions. Most good quality detergents, washing machines and fabrics are manufactured to ensure that when the stated instructions are adhered to and the garment is washed according to the said temperature and dried as per the procedures mentioned; they will wash well and look good after each wash. The following points should be used as guidelines for all garments:

- Before washing, close all zips, undo buttons, check pockets for loose or sharp objects, flatten out collars and cuffs
- Always refer to the Label before Washing
- Always check to ensure the Washing Machine is not overloaded

### PRINTING

Owing to the numerous processes and techniques used for printing on garments, we strongly recommend that a single garment is printed on, then washed and tested to ensure it meets your requirements before bulk printing. Care should be taken to ensure the right kind of pigments/

printing dyes are used while printing and the optimum temperature/heat levels are not exceeded. Violation of standards and procedures will result in the garment losing its feel/lustre as well as weakening of the fabric and overall garment performance.

### FAQ'S

#### GARMENT SHRINKAGE

Excessive Shrinkage is primarily due to factors such as heat and major agitation during the wash cycle. Always wash as per instructions stated on the care label.

#### FADING DUE TO SUNLIGHT

The effects of fading due to Sunlight are both harmful & irreversible. Constant and prolonged exposure to sunlight should be reduced as far as possible.

#### PILLING & BOBBLING

Abrasion and lack of care/timely washing of the garment leads to fibre balls appearing on the surface of the fabric. Remove by mild surface brushing.

#### TRIMS/ACCESSORIES BREAKING OFF

Trims & accessories like zippers, toggles, pocket lining and elastic cords are constructed for normal usage. Extensive abuse of the garment involving sharp objects, work areas with machinery and even the odd outburst of brute force results in the garment being damaged. Precaution & Care should be taken at all times.

#### COLOUR STAINING

Wash similar coloured garments together. Do not leave damp garments together for any length of time.
